

Create Project Deliverables

Rubric

Dimension 1 Problem Solving

Reviewer Comment Prompt

- Look at the project deliverables and comment on the resources used to research problem-solving techniques and solutions.
 - What is a strength of this student's use of resources or problem solving?
 - How could they improve in these areas? Be specific in your suggestion.
 - Is there a resource or method that has helped you? You can share it here!
-

INTRO TO INFORMATION TECHNOLOGY

REVIEWER RATING PROMPT 1: UTILIZATION OF RESOURCES (WEIGHT = 1)

A variety of print and online resources beyond the course materials are available for most information technologies, and peers and facilitators can also help.

Does the student use a wide variety of resource types to research problems while creating the deliverables?

Yes, the student uses a wide variety of resource types to research problems.

Somewhat. The student generally uses multiple sources to research a problem, but generally of the same type.

Not really. The student generally uses just one of two types of sources to research problems.

REVIEWER RATING PROMPT 2: METHODOLOGICAL APPROACH (WEIGHT = 1)

Efficient and effective problem solving such as debugging requires an orderly approach to identifying and resolving issues.

Does the student use a logical, methodical approach to solve problems encountered creating the deliverables?

Student consistently uses a methodical approach to problem solving and debugging.

Student generally uses a methodical approach to problem solving and debugging, but some instances are characterized by a more random approach.

Student does not use a methodical approach to problem solving and debugging.
